PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 6+ years of hands-on experience designing and delivering complete web systems, APIs, mobile applications, and AI-integrated platforms across diverse industries including healthcare, logistics, fintech, and SaaS. Strong core expertise in Laravel and PHP backend development, combined with solid experience in Node.js, Vue.js, real-time WebSockets, cross-platform mobile apps (Ionic), and desktop applications (Electron). Comfortable managing Linux VPS infrastructure end-to-end — from server setup and Nginx configuration to CI/CD and deployment. Experienced in integrating AI models via REST APIs and locally through Ollama. Able to take full ownership of a project from planning to production. Known for clean code, reliable delivery, and effective communication within remote and cross-cultural teams.

TECHNICAL SKILLS

Programming Languages & Frameworks

▶ PHP	Experienced	▶ Laravel	Advanced
▶ Node.js (Express)	Intermediate	▶ JavaScript	Intermediate
▶ Vue.js 3	Intermediate	▶ Ionic + Vue (Mobile)	Intermediate
▶ Bootstrap	Experienced	▶ MySQL	Intermediate

Backend Tools & Extensions

- ▶ Eloquent ORM
- ▶ Livewire
- ▶ Inertia.js
- ▶ Laravel Sanctum
- ▶ Laravel Passport
- ▶ RESTful APIs
- ▶ WebSockets (Laravel & Node.js)
- ▶ Queue & Jobs
- ▶ Laravel Events & Broadcasting
- ▶ Laravel Filament

DevOps & Infrastructure

- ▶ Docker
- ▶ Nginx
- ▶ AWS (EC2, S3)
- ▶ Linux VPS (Debian/Ubuntu)
- ▶ Git
- ▶ CI/CD Pipelines
- ▶ Server Management
- ▶ SSH & Security Hardening
- ▶ Supervisor (Queue Workers)

AI Integration

- ▶ OpenAI API
- ▶ Anthropic API
- ▶ Ollama (Local AI Inference)
- ▶ AI Model Integration
- ▶ LLM Prompt Engineering
- ▶ AI-Powered Feature Development

Soft Skills

- ▶ Team Collaboration
- ▶ Technical Communication
- ▶ Problem Solving
- ▶ Time Management
- ▶ Self-Management (Remote)
- ▶ Code Review & Mentoring
- ▶ Project Ownership
- ▶ Client Communication
- ▶ Adaptability

EMPLOYMENT HISTORY

Senior Backend Developer

MetaforTech • Amman, Jordan • Remote

- Led backend development for multiple SaaS and enterprise-level projects using Laravel and MySQL.
- Designed scalable API architectures with a focus on performance, security, and maintainability.
- Collaborated with cross-functional remote teams to deliver features on schedule.
- Implemented queue-based background processing, event-driven workflows, and caching strategies.

Backend Developer

Smartly • Cairo, Egypt • Remote

- Developed a modular ERP system with Laravel covering accounting, HR, inventory, and project management modules.
- Built clean, reusable service layers and repository patterns to support maintainability at scale.
- Integrated third-party services including payment gateways and external APIs.

Freelance Full-Stack Developer

Self-Employed • Cairo, Egypt • Remote

- Built and delivered complete custom web platforms for clients across Egypt, Jordan, and internationally.
- Managed server setup, domain configuration, and production deployments on Linux VPS (Debian/Ubuntu).
- Used Laravel, Node.js, Vue.js, and Ionic to cover a wide range of client requirements.
- Handled ongoing technical support, bug fixes, and feature expansions post-delivery.

KEY PROJECTS

VGA-XO – Client Management System

Cairo, Egypt • Computer Hardware • Laravel | Feb 2022

Website: vga-xo.com

- Developed a custom client management system for a company specializing in computer components and accessories.
- Clients can log in, view and manage their purchased products, and communicate with support directly through the platform.
- Admins can review and update client orders, manage product listings, handle messages, and oversee a lightweight inventory management module.

Clinic Management & Appointment Booking System

Cairo, Egypt • Healthcare • Laravel | Jul 2022 | Client: Dr. Salah Shaarawy Galal

Website: allergyhelpcenter.com

- Developed a comprehensive web platform for managing full clinic operations including online appointment booking, doctor schedules, and branch management.
- Built financial tracking, staff attendance, and landing page customization modules.
- Supports multiple branches and roles with a clean admin dashboard for full administrative control.

International Airport Parking Management System

Amman, Jordan • Airport Services • Laravel | Apr 2023 | Client: MetaforTech

- Developed a specialized web platform for managing airport car parking services including time-based bookings and additional car services.
- Implemented automated fee calculations, duration tracking, and employee management modules.
- Designed for smooth scalable operations with a detailed reporting module for management insights.

Smart Bus – School Bus Tracking & Management SaaS

Amman, Jordan • SaaS / EdTech • Laravel | Oct 2023 | Client: MetaforTech

- Developed a cloud-based SaaS system for managing school bus operations with real-time GPS tracking for parents via smart notifications.
- Built student check-in/out (attendance) systems, in-school student management, and comprehensive driver management modules.
- Designed as a multi-school SaaS solution with advanced features and scalable multi-tenant architecture.

Lerto System – QR-Based Discount & Merchant Platform

Amman, Jordan • Retail / Fintech • Laravel | May 2024 | Client: MetaforTech

- Developed a platform enabling users to receive instant discounts from restaurants, stores, and service providers by scanning a QR code at the venue.
- Merchants can showcase products, set and manage discount rates, and oversee their stores, orders, and offerings through a dedicated dashboard.
- Implemented real-time QR scanning, user tracking, and full merchant control with detailed analytics.

Kabseh – Food Delivery Platform

Amman, Jordan • Food Delivery / SaaS • Laravel | Dec 2024 | Client: MetaforTech

Website: web.kabseh.app

- Developed the backend platform for Kabseh, a food delivery service connecting customers with local restaurants across Jordan, similar in model to Talabat and Jahez.
- Built core ordering flow covering restaurant listings, menu management, real-time order tracking from preparation through delivery, and customer notifications.
- Implemented merchant dashboard for restaurants to manage menus, orders, pricing, and performance — alongside a driver management module for delivery coordination.
- Integrated multiple payment methods and built an admin control panel for platform-wide user, order, and commission management.

Rawaa System – International Shipping & Warehouse Management

Bikin, China • Logistics / Shipping • Laravel | Feb 2025 | Client: Tick-Soft

Website: rawaa.tick-soft.com

- Developed a complete management system for a Chinese international shipping company handling purchase/shipping orders, invoice tracking, and warehouse operations.
- Built financial management features including money transfers, exchange rate tracking, and per-client account statements aggregating orders, payments, and shipments.
- Implemented container and supplier management including freight forwarders with full control over logistics and accounting processes.

BeesBus – Developer Hiring & Freelance Platform

Egypt • Freelance Marketplace / SaaS • Laravel | Aug 2025

Website: beesbus.net

- Developed a specialized freelance and hiring platform exclusively for software developers, similar in concept to Mostaqel and Nafezly but focused entirely on the tech talent market.
- Clients can post development projects, browse vetted developer profiles, and hire based on skills, experience, and reviews — all within a streamlined workflow.
- Developers can create professional profiles, bid on projects, manage contracts, and build their reputation through a rating and review system.
- Platform includes project milestone tracking, secure messaging, and an admin panel for managing users, disputes, and platform-wide settings.

Dr. Ali Helmi – Clinic Operations Management Platform

Egypt • Healthcare / MedTech • Laravel Filament | Feb 2026

Website: dralihelmi.com

- Developed a comprehensive clinic management platform designed to handle all daily operations from a single intelligent control center.

- Features include smart appointment booking with per-clinic time slots and no-conflict scheduling, live patient waiting queue synced in real time between reception and doctors, and patient file management with full history and notes.
- Built role-based access for three distinct roles — Admin (clinics, services, pricing, staff), Receptionist (attendance, queues, absences), and Doctor (live queue view, visit completion).
- Includes service and pricing management per clinic, staff attendance tracking, absence reporting, and financial export tools with Excel and PDF support for accounting and auditing.
